REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The following is an examiner's statement of reasons for allowance: The primary reason for allowance is drawn to method of treatment of a cancer comprising a combination of at least two clearing agents selected from A and B in the claims together with a radionuclide binding site linked to an antigen binding fragment of an antibody that specifically binds to a tumor-associated antigen. While such antigen binding fragment containing such antibody fragments are known in the art in combination with a clearing agents, there is no teaching in the prior art that provides the requisite motivation to combine at least two of the types of clearing agents recited in the claims. Given that Jones teaches different metal chelating agents from Behr, there is no requisite motivation of using different types of clearing agents for combining the teachings of Jones with Behr. It is noted the double patenting over the '024 patent. It has not been made because of the restriction requirement made therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
